Better overview

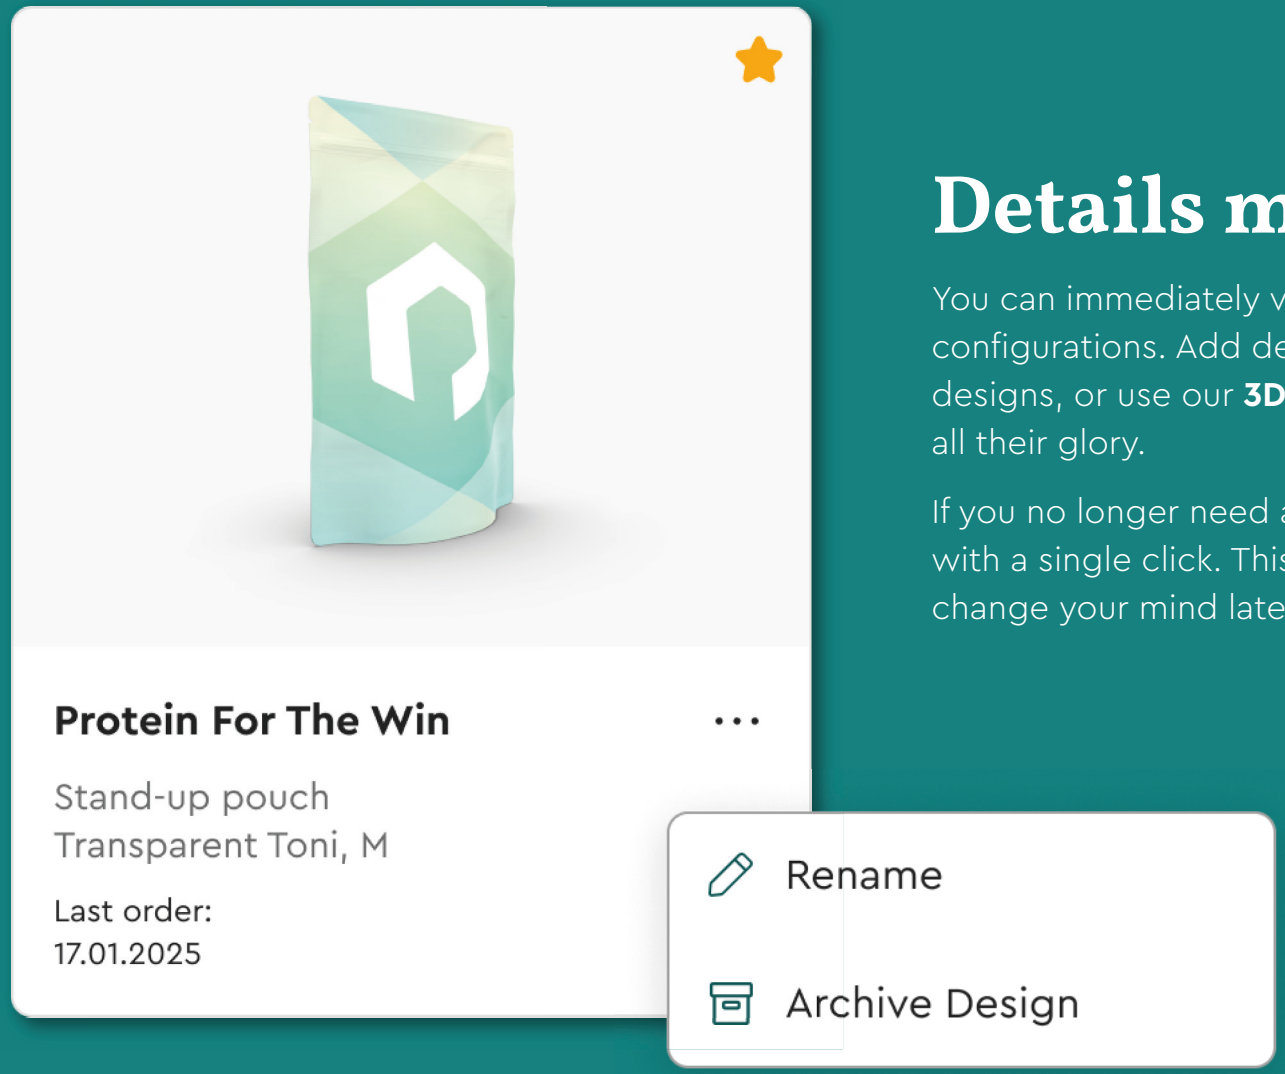

As soon as you upload a design, it will appear in your Design Library. To give you a better overview, you can switch between **two different views**. Use the **grid view** if large preview images help you with your search, or switch to the **line view** if you want to compare designs more easily.

Packiro

Find your designs

Use the **filter** and **sort** function to narrow down the designs displayed. If you are looking for a specific name, you can also do so quickly and easily with our **search** function.

Details matter

You can immediately view the most important details of your configurations. Add designs to your **favorites**, **rename** your designs, or use our **3D preview** function to see your designs in all their glory.

If you no longer need a design, you can move it to the **archive** with a single click. This way, it will always be available if you change your mind later.

More information

Select a design and check all the details, such as the configuration and price.

Your design has changed? No problem. With our **update function**, you can easily upload a new version. You can then move the old one to the archive or keep both versions in the library.

If you need high-resolution graphics of your packaging, you can **create packshots** and then quickly order and download them.

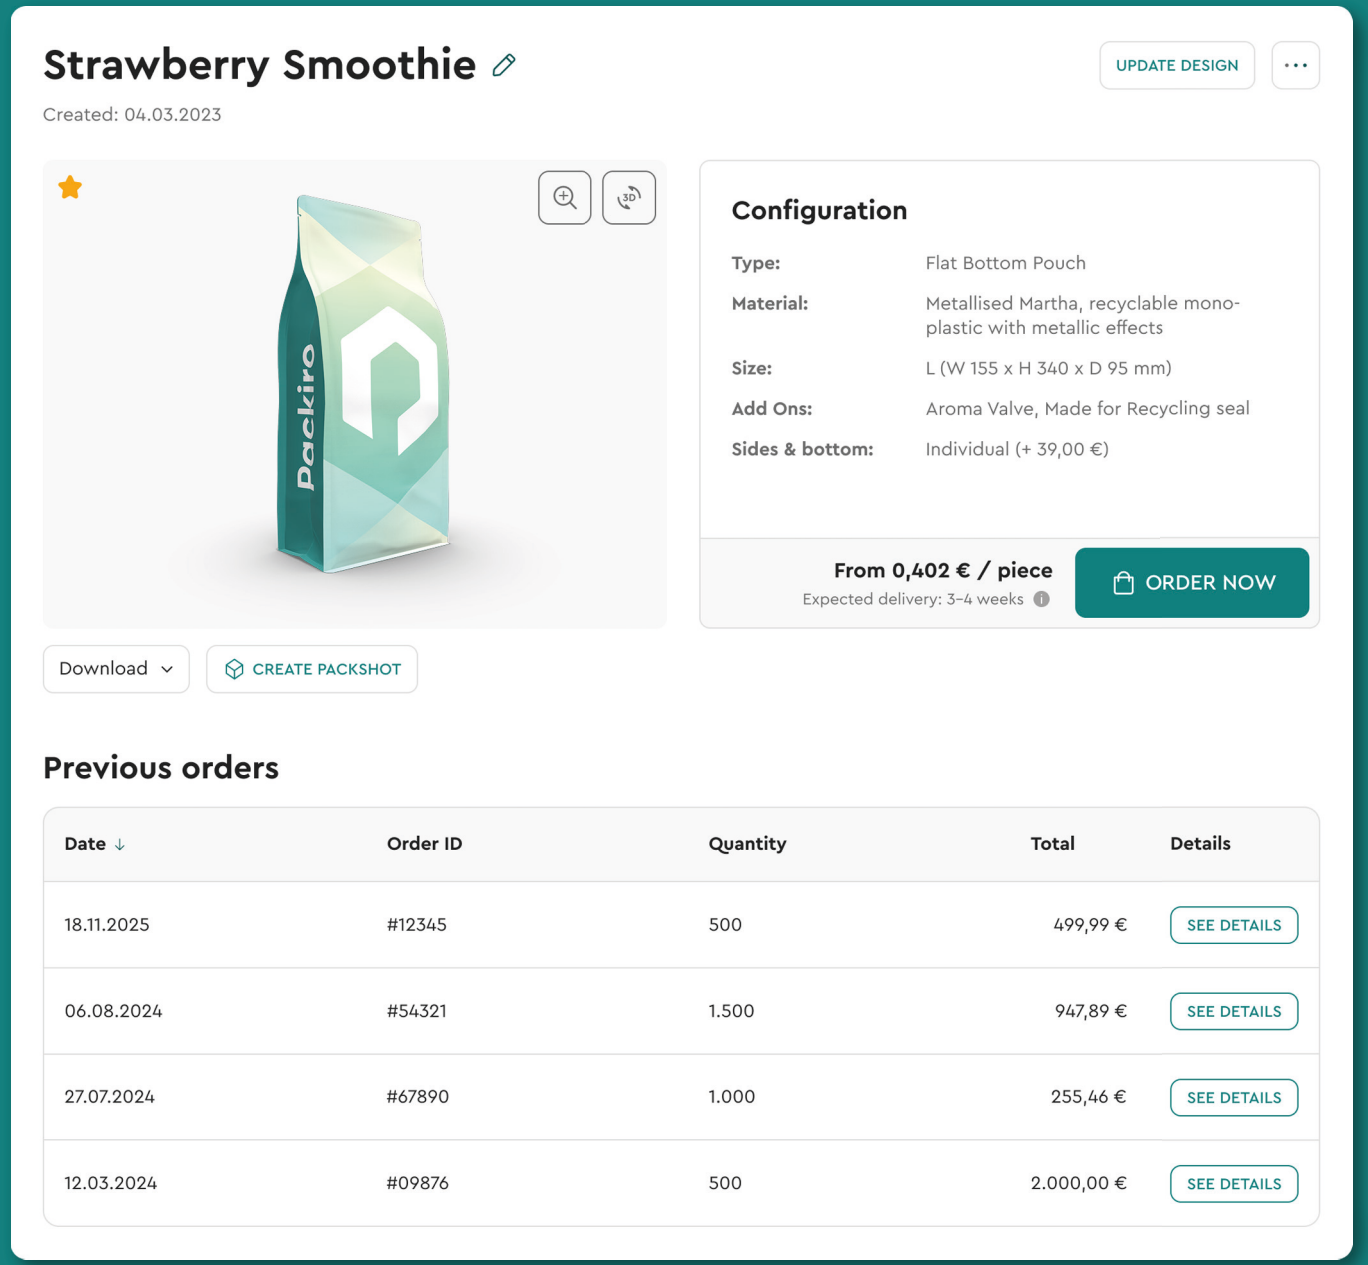

Quick reorder

View all your previous orders that included the selected design.

Reorder your design in no time. All you have to do is click the Order Now button and then select a quantity. You can then add it to your shopping cart immediately.

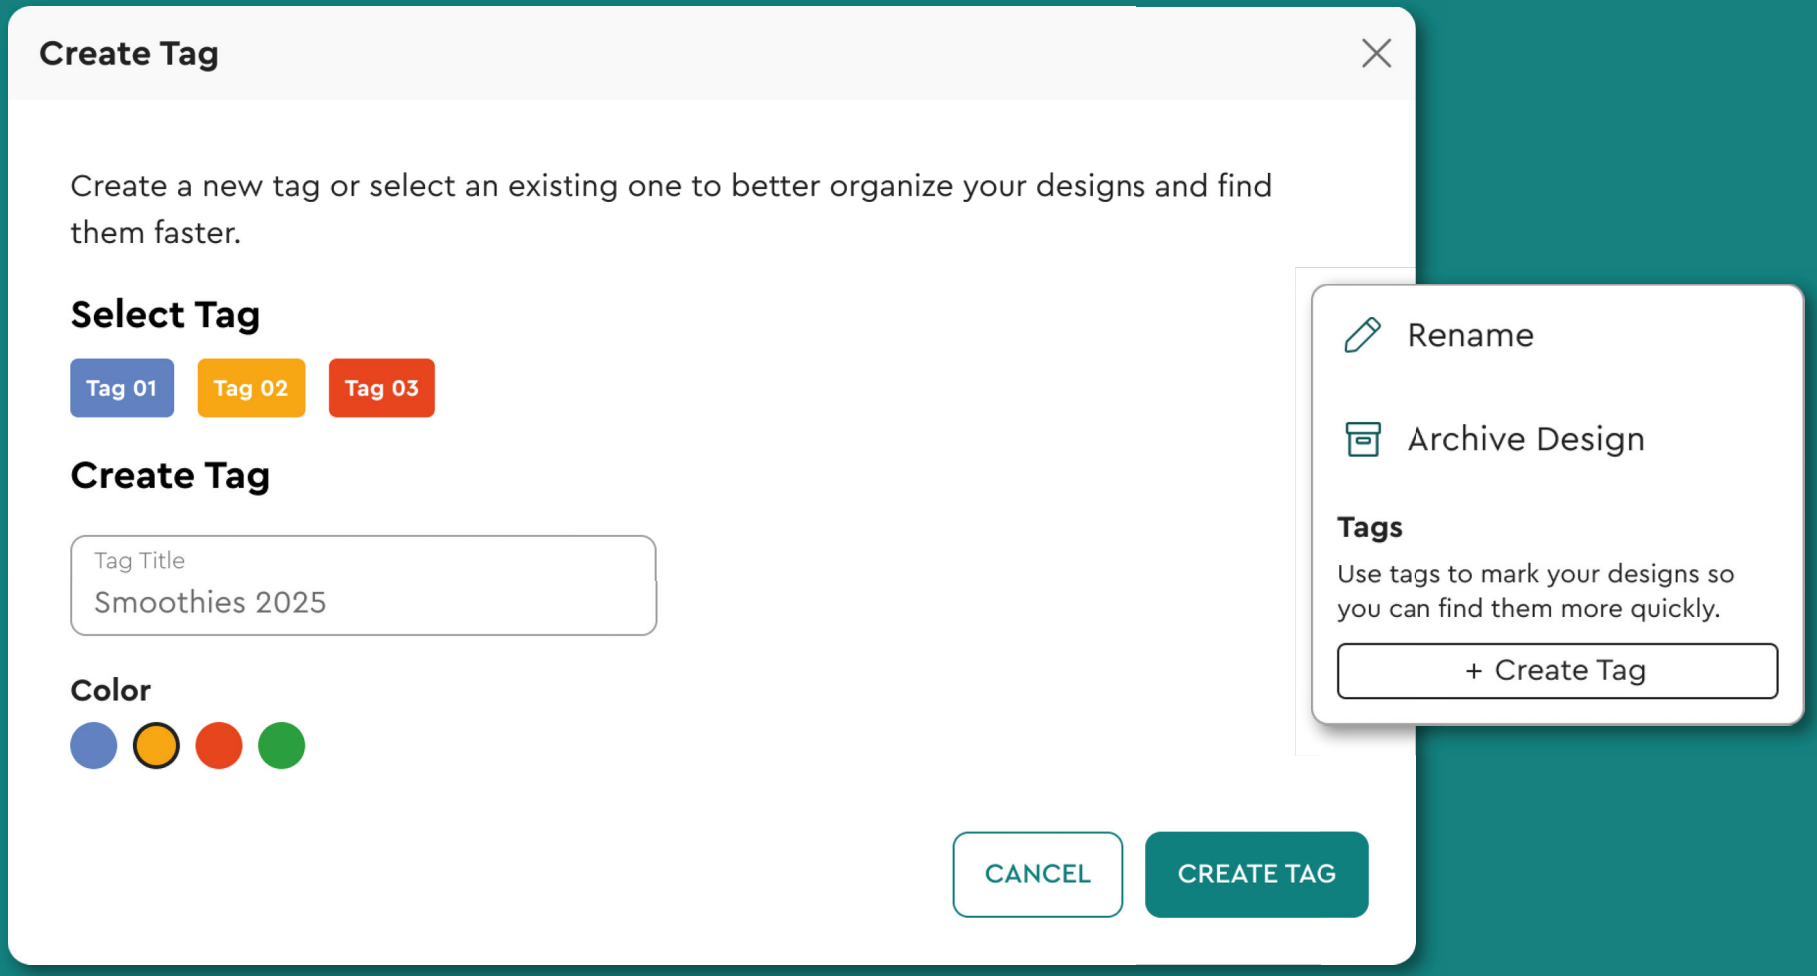

Try it now!

Better organization

Use our **tag feature** that allows you to add tags to your designs. This way, you can organize your designs by theme and find them even more easily by using filters.
